**RETIREE ACTIVITIES OFFICE (RAO) AT LUKE AFB:** We, the volunteer staff of Luke AFB RAO, connect retirees of all military and uniformed services, and their surviving spouses / family members / next of kin, with information and assistance on matters pertaining to their benefits and entitlements. Our goal is to provide guidance and referral assistance on military and uniformed service retiree matters.

## LUKE AFB RAO 2025 VOLUNTEER OF THE YEAR

On 10 Dec 2025, COL John Ryan, Deputy Commander, 56 Fighter Wing, presented

**FREDERICK J. ABRAKE, CAPT (RET), U.S. PUBLIC HEALTH SERVICE (USPHS)**

with a letter and certificate signed by Lt Gen Darryl Roberson, USAF

(Ret) and CMSAF Joanne S. Bass, USAF (Ret) of the USAF Retiree Activities Council, who wrote that Fred's "continued devotion reminds us all what it means to be **"Still Serving."** Fred also received a spectacular USAF statue that hopefully will remind him that he's a terrific mentor to many.

Fred is that rare individual with a can-do spirit, work-hare ethic, and empathetic outlook. Since 2022 when he started as a RAO volunteer, Fred has demonstrated enthusiasm and initiative in assisting retirees with DFAS, SBP, casualty and TRICARE for LIFE. If he doesn't know the answer, he finds it. In addition to his weekly shift, he fills in when gaps in office coverage occur, often at the last minute. In 2025, he stepped up and became RAO Deputy Director and employs his talents to organize and execute missions. He is the driving force behind onboarding and training new volunteers. He manages admin duties from staff rosters to training binders and procuring supplies. Fred even keeps the RAO office stocked with bottled water. He also volunteers at the Navy RAO on base.

During his career, Fred, a 1963 graduate of the Massachusetts College of Pharmacy, worked as a pharmacist with the US Public Health Service from 1964 to 1996. He served as a staff, deputy chief, and chief pharmacist in the PHS and as a Senior Regulatory

Management Officer and Secretary to 3 FDA public advisory committees in the Food and Drug Administration. In the 1980's, he was the PHS pharmacist lead in collaborating with NASA biomedical staff to produce the first medication kit for "Columbia" and future space shuttles. Fred is married to MaryLou. Father of 3. Grandfather of 6.

## SSA ANNOUNCES 2.8 % BENEFIT INCREASE FOR 2026

Oct 24, 2025, Baltimore, MD – The Social Security Administration (SSA) announced today that Social Security benefits, including Old-Age, Survivors, and Disability Insurance (OASDI), and Supplemental Security Income (SSI) payments for 75 million Americans will increase 2.8 percent in 2026. On average, Social Security retirement benefits will increase by about \$56 per month starting in January. Social Security begins notifying people about their new benefit amount by mail starting in early December 2025.

## PLAN. HONOR.

**Key Facts About VA National Cemeteries**

-  Cemeteries offer traditional in-ground burial, cremation, and green burial options (at select locations)
-  There are 157 VA national cemeteries and 35 soldiers' lots and monument sites
-  VA maintains more than 4 million graves
-  VA funds 124 state, territorial and tribal Veterans cemeteries in 47 states and 3 territories

From Natl Cemetery Admin: Veterans of every war and conflict, are buried in VA's national cemeteries. For Veterans not buried in a VA national cemetery, **VA provides headstones, markers, or medallions to commemorate their service**. Nearly 5.3 million people — including 4 million Veterans from the Revolutionary War to the war in Iraq and Afghanistan — are honored with a burial in a VA national cemetery.

**PLAN IN ADVANCE:** Planning in advance for a Veteran's or loved-one's final resting place can eliminate unnecessary delays and reduce stress on a family at a difficult time. Submit application to determine Pre-Need Eligibility.

### MEMORIAL BENEFIT

Furnished in lieu of a traditional Government headstone or grave marker for those Veterans who served on or after April 6, 1917, and whose grave in a private cemetery is marked with a privately purchased headstone.

### MEDALLION: (pictured)

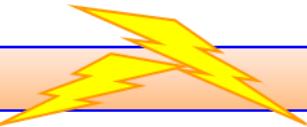

**GREEN BURIAL:** NCA accepts both cremated and intact remains that are prepared naturally for interment in green burial sections at its open national cemeteries.

## RECOGNIZE THIS BUILDING ON LUKE AFB?

by CMSgt Daniel Hall, USAF, 56 Fighter Wing

Have you ever driven by the Blockhouse and said to yourself, "That's a strange-looking building"? If so, you're not alone — and there's a good reason for it. Building 1150, better known as the Blockhouse, is one of Luke Air Force Base's most historic and uniquely engineered structures. Its appearance tells a story that spans decades of innovation, vigilance, and mission evolution.

**Origins: A Cold War Shield** During the height of the Cold War, the United States developed an air-defense network capable of detecting and responding to potential Soviet bomber threats. Luke AFB played a key role in that mission.

In 1959, the base was activated as Direction Center 21 (DC-21) for the Semi-Automatic Ground Environment (SAGE) system.

The Blockhouse — a three-story, heavily reinforced concrete structure — was built to withstand immense blast pressures and protect sensitive early-generation electronics. Inside, it housed the AN/FSQ-7, one of the largest computers ever built, using miles of wiring and thousands of vacuum tubes to process radar data. It integrated radar inputs from sites across the region, creating a real-time air picture to direct fighter aircraft toward unknown or hostile contacts. In its time, the Blockhouse represented the cutting edge of American defense technology.

**Transition to Today's Mission** The SAGE system was deactivated in 1983, and the massive

computer equipment was removed soon after. Rather than demolish the building, the Air Force repurposed it.

The Blockhouse became the central administrative and support hub for Luke AFB.

Over the years, its internal layout was transformed from a massive computer bay into offices, conference rooms, and mission-support spaces.

The building's characteristic "bunker-like" exterior remains, a reminder of its original purpose and engineering.

Even today, the Blockhouse's thick walls and rugged design set it apart from every other structure on base.

**Why the Blockhouse Matters** The Blockhouse isn't just an odd-looking facility you pass on the way to work — it's a living piece of Air Force history. It embodies the evolution of American air defense from radar scopes to integrated networks. It connects Luke AFB's past missions to its current role as the world's premier fighter-pilot training installation.

It stands as a monument to the Airmen, technicians, and operators who served within its walls during a pivotal era of global tension.

Every day we walk past it, we are reminded that our mission is built on the legacy of those who came before us.
