

Coronavirus Disease 2019

COVID-19

What you need to know to keep your family safe and healthy.

WEAR THIS
CLOTH FACE COVERING

NOT THAT
MASK WITH VALVE

Some face masks have a plastic valve embedded in the fabric. This is a one-way valve which prevents pathogens from entering but does not prevent them from leaving when you exhale. When you wear a face mask with a valve, most of what you're exhaling is unfiltered, and you're potentially putting others at risk for the spread of COVID-19.
